Table of contents

Abe, T.: see Nagayama, N. et al. 433
Angeles, J.; Thomson, M.: Profile determination of a drop of liquid under surface tension, gravity and centrifugal forces 329
Annigeri, B.S.: see Cassenti, B.N. 429
Atluri, S.N.: see Iura, M. 73
Atluri, S.N.: see Okada, H. et al. 165

Barthelemy, B.; Haftka, R.T.; Cohen, G.A.: Physically based sensitivity derivatives for structural analysis programs 465
Bharadvaj, B.K.: see Morino, L. et al. 231

Cardona, A.: see Geradin, M. 115
Cassenti, B.N.; Annigeri, B.S.: Thermodynamic constraints on stress rate formulations in constitutive models 429
Chandra, A.: Simulation of rolling processes by the boundary element method 443
Chen, W.-H.; Ting, K.: Hybrid finite element analysis of transient thermoelastic fracture problems subjected to general heat transfer conditions 1
Chen, Z.Y.: see Mang, H.A. et al. 301
Cohen, G.A.: see Barthelemy, B. et al. 465
Coulmy, G.: see Luu, T.S. et al. 309
Cruse, T.A.: IUTAM symposium on advanced boundary element methods: Application in solid and fluid mechanics, April 13–16, 1987, San Antonio/TX, USA 229

Date, H.: Propagation of plastic waves in a long rod with consideration given to temperature rise 177
Diez, F.: see Gavete, L. et al. 361
Dimou, G.: see Tsamasphyros, G. 137

Eguchi, Y.: see Fuchs, L. 105

Fabrikant, V.I.: Close interaction of coplanar circular cracks under shear loading 181
Freedman, M.I.: see Morino, L. et al. 231
Fuchs, L.; Eguchi, Y.: On the accuracy of finite-difference and finite-element methods for the simulation of some incompressible flows 105

Gavete, L.; Michavila, F.; Diez, F.: A new singular finite element in linear elasticity 361
Geradin, M.; Cardona, A.: Kinematics and dynamics of rigid and flexible mechanisms using finite elements and quaternion algebra 115

Haftka, R.T.; Kamat, M.P.: Simultaneous nonlinear structural analysis and design 409
Haftka, R.T.: see Barthelemy, B. et al. 465
Heise, U.: Condition of boundary integral equations in which the sought-for function and the given right-hand side are defined on different domains; round-off errors in the numerical solutions 245
Heuer, R.: see Irschik, H. et al. 293
Hirose, K.: see Saitoh, T. 417
Hoop, A.T., de: see Weiden, R.M., van der 283

Irschik, H.; Heuer, R.; Ziegler, F.: Dynamic analysis of polygonal Mindlin plates on two-parameter foundations using classical plate theory and an advanced BEM 293
Iura, M.; Atluri, S.N.: On a consistent theory, and variational formulation of finitely stretched and rotated 3-D space-curved beams 73

Kamat, M.P.: see Haftka, R.T. 409
Kim, Y.S.; Tomita, Y.; Shindo, A.: Bifurcation and post-bifurcation phenomena of elastic-plastic circular tubes subjected to uniform shrinkage under plane strain condition 211
Kleiber, M.: Natural language estimates of nonlinear response structural sensitivity 373
Kobayashi, S.: see Nishimura, N. 319
Kounadis, A.N.: see Mallis, J. 47
Krempl, E.: see Sütçü, M. 401

Luu, T.S.; Coulmy, G.; Viney, B.: Design problem of the profile or the cascade of profiles and construction of orthogonal networks using the Riemann surfaces for the multiform singularities 309

Mallis, J.; Kounadis, A.N.: On the accuracy of various large axial displacements formulas for crooked columns 47
Mang, H.A.; Torzicky, P.; Chen, Z.Y.: On the mechanical inconsistency of symmetrization of unsymmetric coupling matrices for BEFEM discretizations of solids 301
Michavila, F.: see Gavete, L. et al. 361
Morino, L.; Bharadvaj, B.K.; Freedman, M.I.; Tseng, K.: Boundary integral equation for wave equation with moving boundary and applications to compressible potential aerodynamics of airplane and helicopters 231
Mould, M.P.: Comparison solutions for assessment of inextensional bending in shells of quadratic and cubic polynomial representation 31
Mukherjee, S.: see Poddar, B. 261

Nagaki, S.: see Nagayama, N. et al. 433
Nagayama, N.; Abe, T.; Nagaki, S.: Plastic deformation of inhomogeneous materials with elliptic inclusions 433
Nishimura, N.; Kobayashi, S.: A regularized boundary integral equation method for elastodynamic crack problems 319

Ohyoshi, T.: Backscattering from two fluid-filled cylindrical cavities in an elastic solid 149
Okada, H.; Rajiyah, H.; Atluri, S.N.: Non-hyper-singular integral-representations for velocity (displacement) gradients in elastic/plastic solids (small or finite deformations) 165

Poddar, B.; Mukherjee, S.: An integral equation analysis of inelastic shells 261
Puri, K.K.: Unsteady mixed flows with in-passage shocks 11

Rajiyah, H.: see Okada, H. et al. 165
Reissner, E.: On finite axi-symmetrical deformations of thin elastic shells of revolution 387
Romate, J.E.; Zandbergen, P.J.: Boundary integral equation formulations for free-surface flow problems in two and three dimensions 276
Rydin, R.A.: see Wilson, G.L. 345

Saitoh, T.; Hirose, K.: High-accuracy bench mark solutions to natural convection in a square cavity 417
Sawada, T.: see Ye, G.-W. 161
Seguchi, Y.: see Tada, Y. 219
Shindo, A.: see Kim, Y.S. et al. 211
Sládek, J.: see Sládek, V. 59
Sládek, V.; Sládek, J.: Computation of stresses in axisymmetric elastostatical problems using BEM 59
Sueoka, A.: see Tsuda, Y. et al. 453
Sütçü, M.; Krempl, E.: A stability analysis of the uniaxial viscoplasticity theory based on overstress 401

Tada, Y.; Seguchi, Y.: Structural shape determination under uncertain loading conditions. An extended method of inverse-variational-problem 219
Tamura, H.: see Tsuda, Y. et al. 453
Thomson, M.: see Angeles, J. 329
Ting, K.: see Chen, W.-H. 1
Tomita, Y.: see Kim, Y.S. et al. 211
Torzicky, P.: see Mang, H.A. et al. 301
Tosaka, N.: Integral equation formulations with the primitive variables for incompressible viscous fluid flow problems 89
Tsamasphyros, G.; Dimou, G.: A Gauss quadrature formula for Cauchy type integrals 137
Tseng, K.: see Morino, L. et al. 231
Tsuda, Y.; Sueoka, A.; Tamura, H.; Yoshitake, Y.: Subharmonic vibrations of order 1/2, and almost periodic oscillations of a nonlinear vibrating system with a restoring characteristic of the Duffing type and a retardation 453

Viney, B.: see Luu, T.S. et al. 309

Weiden, R.M., van der; Hoop, A.T., de: Boundary integral equations for the computational modeling of three-dimensional groundwater flow problems 283
Wilson, G.L.; Rydin, R.A.: Time-dependent nodal integral methods in natural convection near a fluid density maximum 345

Xu, D.M.: see Yong, R.N. 199

Ye, G.-W.; Sawada, T.: Some numerical properties of boundary element analysis using half-plane fundamental solutions in 2-d elastostatics 161
Yong, R.N.; Xu, D.M.: A transform-search technique for determination of frequency dependent dynamic properties of earth materials 199
Yoshitake, Y.: see Tsuda, Y. et al. 453

Zandbergen, P.J.: see Romate, J.E. 276
Ziegler, F.: see Irschik, H. et al. 293
